Fill in the mosaic with a limited set of available pieces to build up and complete an image. Solid puzzle game in the same vein as Glass Masquerade, a lot of levels, nice sounds and music, the art is quite simplistic but even at it worst its not too bad and some

of the image design suits it very well. The one problem I did have with the game was that the RNG can badly shift the difficulty. Get to a new image and have a bad set of pieces out at the start and its effectively impossible to get through a level with three stars. There is no guide image shown even briefly when you come in to a new level and if it had one it could have helped significantly as I rarely had any difficulty the second time around. Either way, its a small issue that only cropped up a handful of times, otherwise the game is solid, and at over 7 hours of play to finish it all up, its well worth its price, particularly in a sale.. I had a problem and the developers fixed it. Great fun casual game.. relaxing and very adictive.. Fun little Mosaic game. I'd recommend it if you like puzzle mosaic games.. If you like puzzles and find it on sale, pick it up.. Mosaic: Game of the Gods is jigsaw puzzle game that draws inspiration from stained-glass artwork, the pieces being put together in a beautiful mosaic painting. It begins with a minamilistic, yet gorgeous cinematic that is a simple retelling of the older creation myth, chaos destroying everything and being put back together by order. It's a simple setup for the reasoning behind the puzzles themselves, but it's effective in its approach. There are six packs of puzzles, each with 25 puzzles, the last of which puts a unique spin - pun intended - on the base puzzles. Jigsaw puzzles usually wear out their welcome in video games pretty quickly, but this one is keeping me entertained to the end, because of how different it, and how relaxing it is. Each puzzle has three stars to obtain - one for completing the puzzle, one for finishing it without mistakes, and another for doing it in the allotted time. It's a nice system that is there for completionists, while not disrespecting the time of those who just want to finish a puzzle at their own pace. The unique take on the old jigsaw game is welcome, the only other game of it's ilk that does something differently and good at the same time is Plexus Puzzles. It's nice to see more variety in the genre. The only issue I have with the game is that you only have a limited number of pieces to choose from at any given time. You cannot scroll through all the remaining pieces, which is unfortunate given the fact that the beginning layout of the puzzle changes each time, so it takes some control away from the player. This is a small issue, as it doesn't effect the enjoyment and relaxing aspects of the game all that much. Finally, in regards to the gameplay, there's Fever Mode, which is for those who really like a challenge. You start with a set time limit to solve a series of puzzles, all in that time limit. You gain time by finishing a puzzle, so the faster you solve them the more time you will have to solve the next one. It's effectively a Boss Rush mode in a puzzle game, which adds replay value to a type of game that usually doesn't have any. The artwork is beautiful, and never disappoints. The music, while charming and relaxing as the preview says, gets old after a while. The game could use more variety in the music department. With that said, it's a small annoyance. 5 being Average, Mosaic: Game of Gods scores a 7.5 / 10 -- In a genre that typically does nothing new, Mosaic proves to be both a unique and relaxing experience.
