Can only have one DLC activate at a time - this is not communicated.. Not really a review but. You have to enable all DLCs on the main menu. Choose from the drop down menu under Downloadable content -> Content. Select ON on Options. They were NOT activated automatically even when Steam said they were installed. Took me hours to realize.. Not really a review but. You

have to enable all DLCs on the main menu. Choose from the drop down menu under Downloadable content -> Content. Select ON on Options. They were NOT activated automatically even when Steam said they were installed. Took me hours to realize.. a pretty pointless DLC, it is like playing the normal game with way less content. a pretty pointless DLC, it is like playing the normal game with way less content. Can only have one DLC activate at a time - this is not communicated.
